SUMMARY

Hard-working and versatile software engineer, data scientist and founder. Experienced in data structures and algorithms in both academic and industry settings. Proficient in large-scale application and technology development. Natural leader, eager to work in a diverse and fast-paced environment. Creative in problem solving and software development. Enthusiastic to take on new problems and challenges. Not afraid of responsibility.

PROGRAMMING LANGUAGES AND TECHNOLOGIES

Python	R	AWS, MS Azure, GCP
SQL	Java	CSS
HTML	JavaScript	GPT API

PROFESSIONAL EXPERIENCE

Alcon

Aug 2023 - Present

Junior Data Scientist

As Data Scientist, I developed a large-scale application by following the business requirements. I have repeatedly reduced the time for new releases by working well aligned and supporting other peers. Around the application, I also conducted advanced analysis, sourced data, built and oversaw the construction of ML models and maintained stakeholder relationships. I was a major contributor to the incredible growth of the project and the performance of the algorithm in which I worked.

mBank

Apr 2023 - Jul 2023

Intern in the area of projects, digitisation and information development in finance

At mBank, I had the opportunity to work with big data as a member of the team responsible for the data warehouse, where I checked data quality, created views for business applications and controlled data flow. On my own initiative, I developed ML models for data control and credit forecasting. The models supported the operation of the team and significantly reduced the amount of work on monthly forecasts.

Leanpassion

Sep 2021 - Mar 2023

Junior Transformation Consultant

I have carried out business process transformations based on lean management. I have worked with a number of well-known companies, where I have been able to improve designated processes and prove this with data in the long term. In addition, I have conducted Lean Green Belt training for the same clients.

EDUCATION & CERTIFICATIONS

Bachelor's degree, Global Business, Finance and Governance

SGH Warsaw School of Economics

Master's degree, Advanced Analytics - Big Data

SGH Warsaw School of Economics

Lean Green Belt certification

Leanpassion

Project Management Principles

Project Management Institute

ADDITIONAL PROFESSIONAL ACTIVITIES

Shadow mode project

Apr 2024 - Present

Founder

In the team of three that I have built, we are creating a platform with job offers that aims to be the first choice for people of our generation. For now, the project is in the development phase and I want details to remain confidential. The release date will be known soon.
